

Set 1: Monthly Sales Data

Dataset: Monthly Sales

1. Create a **line chart** to visualize the monthly sales. Label the axes and title the chart appropriately.
2. Generate a **bar chart** to display the top-selling products for the year. Label the chart elements.
3. Develop a **scatter plot** to explore the relationship between advertising budget and monthly sales. Explain the insights drawn from the scatter plot.
4. Build an **interactive dashboard** combining the line chart and bar chart to allow users to explore sales data interactively.

Month	Sales (in \$)
January	15,000
February	18,000
March	22,000
April	20,000
May	23,000

SET 2.Customer Feedback Analysis

Dataset: Customer Satisfaction

Customer ID	Age	Satisfaction Score
1	25	4
2	30	5
3	35	3
4	28	4
5	40	5

Tasks

1. Create a **histogram** to represent the distribution of customer ages. Label the axes and title the chart.
2. Generate a **pie chart** to display the overall distribution of customer satisfaction scores. Include appropriate labels.
3. Build a **stacked bar chart** to visualize the distribution of customer satisfaction scores by age group.

4. Develop a **word cloud** from open-ended customer feedback to identify prevalent customer sentiments.

Set 3: Employee Performance Evaluation

Dataset: Employee Performance

Employee ID	Department	Years of Service	Performance Score
1	Sales	5	85
2	HR	3	92
3	Marketing	7	78
4	Sales	4	90
5	HR	2	76

Tasks

1. Create a **line chart** to visualize the performance trend of employees over time. Include a legend and labels.
2. Generate a **bar chart** showing the distribution of employees across different departments. Label the chart elements.
3. Build a **scatter plot** to analyze the correlation between years of service and performance scores. Explain any insights.
4. Develop a **Tableau dashboard** with the line chart and bar chart for interactive exploration.

Set 4: Product Inventory Management

Dataset: Product Inventory

Product ID	Product Name	Quantity Available
1	Product A	250
2	Product B	175
3	Product C	300
4	Product D	200
5	Product E	220

1. **Create a bar chart** to visualize the quantity of each product in the inventory. Label the axes and title the chart.
2. **Generate a stacked bar chart** to show the quantity of each product within different product categories.
3. **Build a scatter plot** to explore the relationship between product price and quantity available. Explain the findings.
4. **Develop a Tableau dashboard** with the bar chart and stacked bar chart to allow users to interact with the data.
